

# COMPANY SHOWCASE

## WELCOME TO THE GEO:CONNECTION COMPANY SHOWCASE!

Our new 'Company Showcase' feature is the opportunity for vendors from all branches of the geomatics industry to keep you up to date on their latest product and service offerings. Innovation is key to success in today's geomatics market place, coupled with the latest trends in convergence of functionality and capabilities across the boundaries that formerly separated product lines in our industry.

Surveying equipment now incorporates GPS, GIS and communications capabilities, with ever more accuracy, greater local processing power and lower costs. Remote sensing, in the widest sense of the term, achieves new levels of resolution and precision – from laser scanning to oceanographic sensors, from LiDAR and hyperspectral instruments to aerial and satellite image capture. These vast volumes of geodata are incorporated in ever more innovative information and location based services, supporting decision makers at all levels – in government, in commerce and for citizens.

Look also for advances linked to convergence between technologies, from CAD suites now incorporating GIS and decision support tools to smart phones used to collect and disseminate location tagged data for commercial and citizen-based, open source applications. For field use, consumers are now spoiled for choice regarding rugged geospatial data collection and processing equipment, whether PDAs or hand-held computers.

This is an exciting decade for all sectors of the geomatics industry, with innovation powered by creativity, convergence and exciting advances in several allied technologies. Watch this space to keep yourself up to date!

## ALIGNED ASSETS

1

NUMBER ONE FOR GAZETTEERS

### Aligned Assets offering NLPG Web Services through Software By Subscription

Aligned Assets are an industry leader in gazetteer and address management solutions. They supply software to over 100 Local Authorities and Fire & Rescue Services as well as the British Transport Police and Transport for London.

They have recently moved to the revolutionary Software By Subscription (SBS) model, which makes software procurement easier, more flexible and significantly cheaper.

One key offering via SBS is SinglePoint, which is their NLPG web service. At a fraction of what similar services cost, local government, the emergency services, and organisations such as national parks and passenger transport executives can now all begin to take full advantage of the NLPG.

With SinglePoint, organisations can start to make use of UPRNs (Unique Property Reference Numbers) for better joined up working, the NLPG's geographical coordinates for more accurate use of GIS, BS7666 standardisation for ongoing consistency, and a creation methodology that allows for updates as frequently as required.

## ASTUN

2

Astun Technology's iShare data integration and publishing platform enables public sector organisations such as the Police and Local Authorities to make the most of their own data, extracting it, transforming it and publishing it both internally and externally.

iShare can serve call centres via systems integration and citizens via the web with a rich mix of information and maps while delivering real savings through avoidable contact and transactional services. iShare also provides a direct communications channel to citizens that subscribe to its automated 'My Alerts' service.

iShare's My Maps module makes it easy to find local information and services

Easily configured and completely automated iShare is a unique mix of Astun's own purpose built modules and the best Open Source components. In use with over twenty five authorities the award winning iShare platform continues to evolve to meet growing e-services needs.

## BLOM

3

Blom UK (formerly Simmons Aerofilms) is the leading provider of aerial photography and digital mapping solutions for civil engineering design, environmental assessment and land information management. The company employs 98 staff based in Somerset. Blom has a history in the UK stretching back to 1919 and the establishment of Aerofilms – the UK's first commercial aerial photography company. Since then our name has changed but our commitment to innovation, technology and competence remains as strong as ever.

Blom UK are part of Blom ASA and have access to extensive group resources including forty aircraft, multiple airborne sensors, map production and data processing facilities in thirteen countries across Europe.

Blom products and services include high accuracy digital mapping, imagery and orthophotos from aerial photography, 3D city models, DTM's and DSM's from airborne laser scanning (LiDAR), seabed and habitat mapping from bathymetric LiDAR and an extensive data and imagery library.

## CADCORP

4

Cadcorp is a leading developer and supplier of digital mapping and geographic information systems (GIS) software, applications and associated services.

Based in the UK, Cadcorp's distribution and value-added reseller (VAR) network stretches worldwide.

The Cadcorp SIS® - Spatial Information System® product family encompasses desktop GIS modules, web-based GIS software, software developer kits and a mobile data capture solution.

Cadcorp is an ISO9001:2008 and ISO/IEC 27001:2005 certified company, an Oracle® partner, an Ordnance Survey® Developer Partner and a long standing technical member of the Open Geospatial Consortium Inc.® (OGC®).

Cadcorp SIS applications exist in local and central government, emergency services, insurance, housing, land management, commercial and many other markets.

## ESRI

5

Esri®'s geographic Information system (GIS) technology gives you the power to think and plan geographically. Used today in more than 350,000 organizations worldwide, GIS helps governments, universities, and businesses save money, lives, and our environment.

Esri's ArcGIS software is a system that lets you easily author data, maps, globes, and models on the desktop and serve them out for use on a desktop, in a browser, or in the field via mobile devices, depending on the needs of your organization. From simple overlays to sophisticated modeling and from high cartographic output to image processing, everything is made possible by the power of ArcGIS.

## KOREC

6

KOREC offer the full range of Trimble MGIS Handheld Mobile Data Capture devices and the latest Data Capture Software. Our team of expert GIS consultants will ensure that we provide the best positioning solution for your requirements and budget.

Trimble is renowned for integrating advanced GPS technology into their rugged field hardware resulting in unsurpassed Mobile Data Capture instrumentation designed to work in all conditions and environments, combining this hardware with streamlined software workflows, ensures Trimble solutions maximise your productivity by making GIS data collection a simple yet efficient process.

By offering integrated solutions with leading-edge innovation, KOREC ensures premier productivity and return on investment. For all your GIS data collection, maintenance and asset management needs, you can rely on KOREC and Trimble for unparalleled accuracy and reliability. Trimble will be exhibiting at Intergeo, you can meet with the Trimble MGIS team in hall 11.1 stand 1B.150.

KOREC are exhibiting at the Infrastructure Now! virtual event. Visit [www.korecgroup.com](http://www.korecgroup.com) for more details.

## LEICA

7

when it has to be right

Whether you want to stake-out an object on a construction site or you need accurate measurements of a tunnel or a bridge; whether you want to determine the area of a parcel of land or need the position of a power pole or to capture objects for as-built maps – you need reliable and precise data.

Leica Viva combines a wide range of innovative products designed to meet the daily challenges for all positioning tasks. The simple yet powerful and versatile Leica Viva hardware and software innovations are redefining state-of-the-art technology to deliver maximum performance and productivity. Leica Viva gives you inspiration to make your ambitious visions come true. When it has to be right.

## TOPCON

8

### Mobile GNSS positioning solutions

Topcon is able to provide you solutions for all your positioning needs. With bespoke software options to ensure your work flows are optimised enabling you to get your tasks done in a time and cost saving manner.

With innovative products like the GRS-1 the GPS + GLONASS RTK solution in the palm of your hand Topcon fits user markets from versatile sectors that require a reliable positioning solution for any application.

Topcon designs and manufactures precise positioning products and solutions for the global surveying, construction, agriculture, civil engineering, mapping and GIS, asset management and mobile control markets. Topcon Corporation is traded on the Tokyo Stock Exchange (7732).

**We are looking forward to welcome you at Intergeo Cologne Germany: Hall 11.2 Stand number 2a.150.**
