Product name: SuperpOSe Service

SuperpOSe Service is a managed service for the translation and styling of all 4 vector layers of OS MasterMap into files for GIS or CAD software. Dotted Eyes processes the customer's data automatically each quarter, and ships the translated data to the customer on disc. It's an effortless way to update OS MasterMap.

Cost Contact Vendor

Description: Each quarter, the customer receives a new disc with their updated data, processed precisely for the format and structure that is needed for their system. The data is not only translated, it is also enhanced. Enhancements include the availability of symbols and patterns defined in the Ordnance Survey style guide, and symbols resembling DfT road signs are used for the Integrated Transport Network (ITN) Layer, making the most of the available routing information. The letters used for text include all the accent marks required for Welsh and Gaelic names. The service is customisable through a range of optional extras, including the application of a custom parameter file and/or custom workbench to adjust the styling or output structure to the customer's specific needs.

FireRisk Solution

Airwave launches technology which enables fire crews to be better informed at incidents they attend

Cost Contact Vendor

Description: FireRisk is a mobile data solution that enables fire & rescue services to have up-to-date information on building risks at incidents by carrying out more proactive risk assessment checks on premises, and to do so with greater accuracy. Developed in association with the Fire and Rescue Service, it transforms the collection of risk information, and associated tasks, replacing paper-based processes for handling risk and fire checks with secure digital information. It runs on compact, hand-held devices and works anywhere due to offline/online capability.
