### Envitia appoints new Chief Technology Officer to Board of Directors

British technology and data services company, Envitia, has appointed its new Chief Technical Officer (CTO), **Dr Ricardo Santos**, to its Board of Directors. As CTO of Envitia, Santos sets the technical direction and works closely with developers and data consultants to deliver end-to-end data analytics solutions for clients, particularly drawing on Envitia's heritage in **location-based data**. He also heads the development of back-end and front-end analytics using a range of enterprise and cloud technologies. Santos, who joined the company in November, brings with him over 20 years of experience from leading technology companies where he was responsible for the development of **Business Intelligence and Data Warehousing solutions** for several public and private sector organisations. ## AWARD

### Seequent Wins 2020 Esri Partner Award

Seequent has received a 2020 Esri Partner Award, 'Analytics to Insights', for its industry-first tool **Target for ArcGIS Pro** which enhances the integration of mining and exploration data. The recently released Target for ArcGIS Pro which enables the seamless integration of subsurface drilling and borehole data into ArcGIS Pro, creates end to end solution that allows geoscientists to find what's hidden faster. Target for ArcGIS Pro is now the industry standard for **importing, viewing and analyzing geological data**. Sara Deschamps, Seequent's Product Owner, and her team created the geological software extension that enables mining and mineral exploration customers to visualize their drillhole projects in ArcGIS Pro.
